Knowledge Flows, Governance and the Multinational Enterprise - V. Mahnke
2003-12-18 This book contributes to the understanding of Knowledge Governance in the Multinational Corporation. Intra-firm and inter-firm processes of knowledge creation, sharing and exploitation have attracted increasingly managerial and scholarly interest. However the relation between particular knowledge processes, determinants of organizational choices, governance mechanisms, their relevant costs and benefits, and associated strategic advantages remain less well understood. To address these challenges, this book gives answers to the following questions. What are key challenges of governing knowledge in the multinational corporation? How do contingencies influence relevant trade-offs? How do sets of governance mechanisms respond to problems of cognition and incentives?

Environment & Planning - 2005-07

Taking Place - Anders Houltz 2006

Corporate Governance and Capital Flows in a Global Economy - Peter Cornelius 2003 With global financial markets having become more integrated, the book pays particular attention to the role of corporate governance in emerging-market economies and international capital flows. Rich in facts and ideas, the book is for anyone interested in financial crises, international risk management and global competitiveness.

Managing the Embedded Multinational - Mats Forsgren 2005 Focusing on the internationalization of firms in terms of management issues and headquarters control, the influence of subsidiaries on decisions and learning processes within multinational corporations, this book uses case studies from 20 multinational corporations.

Knowledge Transfer in Multinational Enterprises - Margaret Spring Schomaker 2006

The Globalization of Retailing - Neil M. Coe 2009 This path-breaking collection brings together seminal contributions from the burgeoning multidisciplinary literature on the globalisation of retailing.

Knowledge Flows and Industrial Clusters - Rakesh Basant 2002

Governance Issues in the Digital Economy - Frédérique Sachwald 2002

Transforming International Organizations - William G. Egelhoff 1998 International strategies and the organizational designs of multinational corporations are in a period of transition; the dominant designs of the recent past are gone and new dominant designs have not yet emerged. This authoritative collection of articles by leading international scholars presents the dominant ways of examining and understanding these current changes. It investigates contrasting points of view and provides the reader with a framework for evaluating the transformation of international corporations and for developing a critical insight which will be as useful for understanding future changes as it is for understanding those that have already occurred.

The Rise of Transnational Corporations from Emerging Markets - Karl P. Sauvant 2008 This comprehensive analysis deals with the range of issues raised by the rise of transnational corporations from emerging markets. This insightful book shows that foreign direct investment (FDI) from emerging markets has grown from negligible amounts in the early 1980s to $210 billion in 2007, with the stock of investment now being well over $1 trillion. This reflects the rise of firms from these economies to become important players in the world FDI market. The contributors to this book comprehensively analyze the rise of emerging market TNCs, the salient features of the transnational activities of these firms, the relationship of outward FDI and the competitiveness of the firms involved, their impact on host and home countries and implications for the international law and policy system. The subject of this study is both topical and important and poses a number of challenges that will require considerable policy attention in
the future. It will appeal to academics interested in FDI as well as emerging markets. Karl P. Sauvant has gathered together a group of leading academics that makes this an informative and valuable read for anyone interested in the subject, including academics, students at all levels and private sector entities, as well as government officials dealing with outward FDI.

**Industrial and Labor Relations Review** - 2013

**Agricultural Knowledge Flows** - Farhad Jameel 1988

**A European Way for the Information Society** - Information Society Forum 2000

**The Rise of Indian Multinationals** - Karl P. Sauvant 2010-11-15 “India is growing a set of world class multinationals. These range from Tata’s ownership of Jaguar to nimble entrepreneurial firms in high tech and knowledge based businesses. This book is an eye opener to those who still think that globalization is driven solely by Western multinationals: in fact emerging economies like India are now full partners in world economic development.”--Alan M Rugman, Henley Business School, University of Reading

**China’s International Relations in Asia** - Mingjiang Li 2009-10-01 This new Major Work is fully indexed and includes a comprehensive index, newly written by the editor, which places the collected material in its historical and intellectual context. It is destined to be valued by scholars, students and researchers.

**Dissertation Abstracts International** - 2009

**Analysis of Multinational Strategic Management** - Alan M. Rugman 2005

Characterized by new analytical insights and methods in the field of international business, this collection of articles by Alan Rugman and Alain Verbeke celebrates their long and productive work together on issues facing top managers of multinational enterprises. Fueled by their belief in the need for better theory in multinational strategic management, the authors have explored a number of different facets in this increasingly important realm. They've organized the work into five sections: the foundations of a new theory of multinational strategic management, a radically new examination of multinational strategic management, national competitiveness, the relatively under-researched but increasingly important issue of environmental strategies of multinational enterprises, and the interactions between multinational strategic management and public policy. This outstanding collection, inspired by the occasion of Alan Rugman's 60th birthday, will be of great interest to scholars and practitioners of international business and management, as well as to economists and lawyers.

**Competing in Emerging Markets** - Hemant Merchant 2008

Covering all aspects of competition, uncertainty and managerial responses in new and emerging business environments, this title includes a combination of cases and readings that are ideal for teaching.

**Modern Management** - Samuel C. Certo 2006

This book provides a comprehensive, flexible approach to the basic skills of business.
management with an emphasis on skills and applications. It presents traditional concepts, important contemporary issues, and timeless insights into applying management know-how—all toward the goal of achieving organizational success. Built around the concept of “Core Plus” - a core of chapters covered in most courses, surrounded by a rich selection of optional chapters - enabling flexibility in the way the text is used. Management History, Operations Management, Information Technology in Management, and Creativity and Innovation in Management. For managers at all levels.

Strategic Leadership in High Technology Management- 1990

The Internationalisation Strategies of Small-country Firms-Howard Dick 2007 The international business literature often struggles to depict a universal experience of internationalisation from the perspective of large countries. This book seeks to enrich the literature by providing a nuanced overview of the little-known Australian experience, being an atypical case of a small- to medium-sized economy which liberalised rapidly from the 1980s outside any trading bloc. Six data-rich survey chapters explore Australia's mixed success in founding its own multinationals. The experience of Australian firms is set in historical and comparative perspective, including interactions with inward and specifically American FDI. Five industry studies next consider why firms in retail, wine and professional services were more successful than in financial services and shipping. Nine detailed case studies of firms then identify the elements of administrative heritage, strategy and learning that have been the key to success or failure. The book concludes by outlining what can be learned from Australia’s example and presenting implications for future research. The Internationalisation Strategies of Small-Country Firms will appeal to scholars, researchers and postgraduate students in international business and international economics.

Creating and Sharing Subsidiary Knowledge Within Multinational Corporations-Maria Andersson 2003

Knowledgemanagement in Developing Economies-Kate Hutchings 2007 This important book brings together a set of original key contributions to knowledge management in developing economies. It encompasses a wide range of countries throughout Africa, Asia, the Middle East, and Latin America as well as the transition economies of the former socialist countries in Eastern Europe. These carefully selected country case studies represent a broad range of issues in managing knowledge. They consider the way in which knowledge management processes and practices are influenced by local culture and institutions as well as by interaction with the broader international community. The need for an aggregated analytical approach in untangling the increasingly complex process through which knowledge processes are created, transferred and deployed is also highlighted. The book provides a strong nexus between theory and practice by offering solutions to problems such as: minimising knowledge leakage, creating knowledge-sharing cultures and promoting management learning. Presenting the latest research on intercultural knowledge management, this book will be warmly welcomed by researchers, students and lecturers with an interest in international management and knowledge management. Its strong focus on practitioner implications will provide international managers with invaluable suggestions on how to maximise knowledge sharing in international joint ventures and subsidiary operations.

Network Knowledge in International Business-European International Business Academy. Conference 2002 Presenting revised versions of 13 papers from the December 2000...
conference in Maastricht, this volume focuses on current research concerning the strategic importance of subsidiary networks to the multinational firm. The discussions center on the changing theoretical conception of networks, the importance of spillovers and agglomeration economies related to multinational investments, and the management of information flows. The contributors are scholars of business, management, and economics, working in Europe, Australia, and the United States. Annotation copyrighted by Book News, Inc., Portland, OR

**Globalization, International Spillovers and Sectoral Changes**- Charlie Karlsson 2018 As a consequence of globalization, news, ideas and knowledge are moving quickly across national borders and generating international spillovers. So too, however, are economic and financial crises. Combining a variety of methods, concepts and interdisciplinary approaches, this book provides an in-depth examination of these structural changes and their impact. Assessing the implications of globalization for businesses and sectors, chapters focus on the interdependencies between different economic and political layers, and explore topics such as human capital, creativity, innovation, networks and collaboration.
