Investigating Participant Structures in the Context of Science Instruction - Richard Lehrer 2014-07-16 First Published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

Investigating Classroom Discourse - Steve Walsh 2006-04-18 Introducing language use and interaction as the basis of good teaching and learning, this invaluable book equips teachers and researchers with the tools to analyze classroom discourse and move towards more effective instruction. Presenting an overview of existing approaches to describing and analyzing classroom discourse, Steve Walsh identifies the principal characteristics of classroom language in the contexts of second language classrooms, primary and secondary classrooms, and higher education settings. A distinct feature of the book are the classroom recordings and reflective feedback interviews from a sample group of teachers that Walsh uses to put forward SETT (Self Evaluation of Teacher Talk) as a framework for examining discourse within the classroom. This framework is used to identify different modes of discourse, which are employed by teachers and students, to increase awareness of the importance of interaction, and to maximize learning opportunities. This book will appeal to applied linguists, teachers and researchers of TESOL, as well as practitioners on MEd or taught doctorate programmes.

Investigating Our Experience in the World - April L. Morgan 2011-05-15 Investigating Our Experience in the World begins with an overview of basic concepts. Properly known as existential-hermeneutic-phenomenology, this style of scholarly investigation has been applied to illuminate a wide range of research questions. The empirical, qualitative approach outlined in this book, uses disciplined forms of dialogue as the primary means of gathering and assessing information about human experience. Each subsequent chapter describes a major stage of a research study. -[book cover]

Analyzing Group Interactions - Matthias Huber 2020-04-07 Analyzing Group Interactions gives a comprehensive overview of the use of different methods for the analysis of group interactions. International experts from a range of different disciplines within the social sciences illustrate their step-by-step procedures of how they analyze interactions within groups and explain what kind of data and skills are needed to get started. Each method is discussed in the same, structured manner, focusing on each method's strengths and weaknesses, its applicability and requirements, and the precise workflow to "follow along" when analyzing group interactions with the respective method. The analyzing strategies covered in this book include ethnographical approaches, phenomenology, content analysis, documentary method, discourse analysis, grounded theory, social network analysis, quantitative ratings, and several triangulative and mixed-method research designs. This volume is recommended for researchers at all levels that need guidance with the complex task of analyzing group interactions. The unified structure throughout the book facilitates comparison across the different methods and helps with deciding on the approach to be taken.

Contextual Variability and Communicative Competence - Denise Glyn Borders-Simmons 1985

Prague Linguistic Circle Papers - Eva Hajiova 1996-01-01 Volume 2 of the Prague Linguistic Circle Papers constitutes a single whole together with Vol. 1 of the series, reviving the classical series of Travaux du Cercle linguistique de Prague which was of great importance for the development of European structural linguistics in the 1930s. In the present volume, nine Czech linguists and eight authors from abroad present new ideas in various domains from basic properties of the system of language to discourse types and to history of linguistics in the 20th century. Fundamental issues of structural linguistics are discussed by C.H. van Schooneveld and F. Cermak, those of quantitative linguistics by M. Tejitelova, of sentence structure by

**Investigating Pragmatics in Foreign Language Learning, Teaching and Testing**-Eva Alcón Soler 2008 The book focuses on investigating pragmatic learning, teaching and testing in foreign language contexts. The volume brings together research that investigates these three areas in different formal language learning settings and focuses on different foreign languages. The book should be of interest to graduate students and researchers working in the area of second language acquisition.

**Investigating Society**-Robert G. Burgess 1989

**Investigating the Influence of the 2 X 2 Achievement Goal Framework on College Athletes' Motivation and Performance**-Christina Rhee Bonney 2006

**Discursive Practice in Language Learning and Teaching**-Richard F. Young 2009-03-16 Discursive Practice is a theory of the linguistic and socio-cultural characteristics of recurring episodes of face-to-face interaction; episodes that have social and cultural significance to a community of speakers. This book examines the discursive practice approach to language-in-interaction, explicating the consequences of grounding language use and language learning in a view of social realities as discursively constructed, of meanings as negotiated through interaction, of the context-bound nature of discourse, and of discourse as social action. The book also addresses how participants’ abilities in a specific discursive practice may be learned, taught, and assessed.

**Index to Theses with Abstracts Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards**- 2008

**Investigating the Relationship Between Health and the Landscape**-2001

**Second Language Acquisition in Context**-Rod Ellis 1987

**Journal for Research in Mathematics Education**- 1996

**Report and Recommendations of the Investigating Committee Into a System Of Local Government for South Africa**-Council for the Coordination of Local Government Affairs (South Africa) 1990

**Understanding Spoken Language**-Donald E. Walker 1978

**Language, Sex and Social Structure**-J. Clark 2012-11-13 This book offers an innovative way of doing critical discourse analysis that focuses on the performatively produced concepts and social structures that support oppressive attitudes in a community. It draws upon ethnographic data from a women’s field hockey club to examine players’ homophobic attitudes towards lesbians on the team.

**Dissertation Abstracts International**- 2005
Data Collection in Context - Stephen Ackroyd 1981

Experiments Investigating Fundraising and Charitable Contributors - R.M. Isaac 2006-04-21 Consists of nine papers that use experimental and theoretical tools to examine issues pertaining to charitable auctions and fundraising. This volume explores themes such as the structure of charity auctions, charity lotteries, fund drives, and more. It explores the structure of different fundraising and charitable programs.

English as an Academic Lingua Franca - Beyza Björkman 2013-01-30 Open publication As a result of globalization, higher education institutions throughout the world are adopting English for parts of their education. Higher education is becoming increasingly international and thus linguistically diverse, for educational, idealistic and financial reasons. This book presents a much-needed description of English as a lingua franca (ELF) from an international university setting and focuses on form and pragmatic issues, using authentic spoken data. It provides useful insights into how communicative effectiveness can be achieved in spoken lingua franca communication.

Annual Summary of Investigations Relating to Reading - 1992

Investigating Gender - Becky Francis 2001 Investigating Gender maps the contemporary and developing theoretical debates in the field of gender and education and provides an overview of the diverse areas of research within gender and education.

Investigating Language Anxiety Through Action Inquiry - Alyson McGee 1999

Investigating Communication - Lawrence R. Frey 2000 This book provides a comprehensive, balanced introduction to communication research methods. Designed for readers who have little or no familiarity with research methods, this book helps one become a more knowledgeable and competent consumer (and limited producer) of scholarly research and of the everyday research to which they are exposed by the mass media. Praised for its accessible writing and extensive real-life examples, this book takes a step-by-step approach through the communication research process. Investigating Communication shows how communication research is conducted from start to finish, with the book's organization modeled after a traditional research study. By making the material accessible rather than impossible to learn, readers become excited about studying research methods. For anyone interested in the introductory methods of communication research.

Information Security and Privacy - 2000

Researching the Arts Therapies - Roger Grainger 1999 Writing from a dramatherapist's perspective, Roger Grainger looks at methods of researching the arts therapies, and how particular definitions of research affect our understanding and practising of arts therapies. He places approaches to research in four categories: quantitative research (which seeks to demonstrate), qualitative research (which explains by describing), action research (which explains by experiencing) and art-based research (which aims to document in an appropriate language, in this case art). Grainger evaluates all of these approaches, arguing that our theoretical or philosophical understanding of what research actually is has an effect on what we think research can be used for. Grainger argues that research always involves a trade-off between two kinds of inaccuracy, numerical and experiential, which correspond to the imprecise fit of the way we think about life and life itself. A range of research paradigms is useful because each regards the world in a different way. Taken together they provide a range of ways of increasing our understanding.
Investigating Science Communication in the Information Age - Richard Holliman 2009 Sections include: Engaging with public engagement, Researching public engagement, Studying science in popular media, Mediating science news, Communicating science in popular media and Examining audiences for popular science.

Journal of College Student Development - 1991

Sport, Professionalism, and Pain - P. David Howe 2004 Drawing upon cutting-edge research findings David Howe develops a new theory of the link between medicine, the body and culture and asks whether the athlete or the administrator has more control over the body of the sportsperson.

Analyzing Communication - Wolff-Michael Roth 2010 The collection of data sources in the social sciences involves communication in one form or another: between research participants who are observed while communicating or between researcher and researched, who communicate so that the former can learn about/from the latter. How does one analyze communication? In particular, how does one learn to analyze data sources established in and about communication? In response to these questions, the authors provide insights into the "laboratory" of social science research concerned with the analysis of communication in all of its forms, including language, gestures, images, and prosody. Writing in the spirit of Bourdieu, and his recommendations for the transmission of a scientific habitus, the authors allow readers to follow their social science research in the making. Thus, each chapter focuses on a particular topic-identity, motivation, knowing, interaction-and exhibits how to go about researching it: How to set up research projects, how to collect data sources, how to find research questions, and how to do many other practical things to succeed. The authors comment on excerpts from the findings of between 2 and 4 published studies to describe how to write and publish research, how to address audiences, which decisions they have made, which alternative approaches there might exist, and many other useful recommendations for data analysis and paper publishing. In the end, the authors actually follow an expert social scientist as he analyzes data in real time in front of an audience of graduate students. The entire book therefore constitutes something like a journey into the kitchen of an experienced chef who gives advice in the process of cooking.

Investigating Research Integrity - 2002

Investigating the Social World - Russell K. Schutt 1999 "The Fourth Edition of Russell Schutt's social research text, Investigating the Social World: The Process and Practice of Research, links the "doing" of social research to important social issues, including substance abuse, domestic violence, gender roles, and homelessness. Each chapter presents an interesting research question and demonstrates how the methods introduced in that chapter can be used to help answer the research question posed. This book not only emphasizes research techniques but also equips students with the critical skills necessary to evaluate research done by others." "Investigating the Social World is an accessible introductory text for research methods courses in sociology, criminal justice, social work, communication and journalism, political science, and public administration."--BOOK JACKET.

The Discourse Potential of Underspecified Structures - Anita Steube 2008 The volume demonstrates the interdependence of man's language capacity and his other conceptual capacities. This enables linguistic structures to be minimalised, and for extra-linguistic domains to provide much of the interpretations of sound and meaning. Underspecification is demonstrated in the word formation of Indo-European, Late Archaic Chinese and modern Khmer; on the word- and sentence levels by the event structures of German; and in the information structure predominantly of languages with the so-called free word order: German, Slavic languages, Arabic compared with English and the tone language Hausa. The volume is noteworthy due to the close cooperation between theoretical and experimental research. Within grammar, it has especially strengthened prosodic research and the syntax-phonology interrelations and their
interpretations, and it has helped to create data bases for the relations within texts and to evaluate the findings.

Investigating Language Maintenance-Ruth Kelley Goetz 2001

ACCOUNTING, ORGANIZATIONS AND SOCIETY- 2001

International Journal of Sport Psychology- 2002

Guiding School Improvement with Action Research-Richard Sagor 2000-05-15 Action research, explored in this book, is a seven-step process for improving teaching and learning in classrooms at all levels. Through practical examples, research tools, and easy-to-follow "implementation strategies," Richard Sagor guides readers through the process from start to finish. Learn how to uncover and use the data that already exist in your classrooms and schools to answer significant questions about your individual or collective concerns and interests. Sagor covers each step in the action research process in detail: selecting a focus, clarifying theories, identifying research questions, collecting data, analyzing data, reporting results, and taking informed action. Drawing from the experience of individual teachers, faculties, and school districts, Sagor describes how action research can enhance teachers' professional standing and efficacy while helping them succeed in settings characterized by increasingly diverse student populations and an emphasis on standards-based reform. The book also demonstrates how administrators and policymakers can use action research to bolster efforts related to accreditation, teacher supervision, and job-embedded staff development. Part how-to guide, part inspirational treatise, Guiding School Improvement with Action Research provides advice, information, and encouragement to anyone interested in reinventing schools as learning communities and restructuring teaching as the true profession it was meant to be.
