Clientelism and Patronage in the Middle East and North Africa-Laura Ruiz de Elvira 2018-07-17 One common demand in the 2011 uprisings in the MENA region was the call for 'freedom, dignity, and social justice.' Citizens rallied against corruption and clientelism, which for many protesters were deeply linked to political tyranny. This book takes the phenomenon of the 2011 uprisings as a point of departure for reassessing clientelism and patronage across the entire MENA region. Using case studies covering Morocco, Tunisia, Egypt, Jordan, Lebanon, Turkey and the Gulf monarchies, it looks at how the relationships within and between clientelist and patronage networks changed before 2011. The book assesses how these changes contributed to the destabilization of the established political and social order, and how they affected less visible political processes. It then turns to look at how the political transformations since 2011 have in turn reconfigured these networks in terms of strategies and dynamics, and concomitantly, what implications this has had for the inclusion or exclusion of new actors. Are specific networks expanding or shrinking in the post-2011 contexts? Do these networks reproduce established forms of patron-client relations or do they translate into new modes and mechanisms? As the first book to systematically discuss clientelism, patronage and corruption against the background of the 2011 uprisings, it will be a valuable resource for students and scholars of Middle Eastern Studies. The book also addresses major debates in comparative politics and political sociology by offering 'networks of dependency' as an interdisciplinary conceptual approach that can 'travel' across place and time.

Patron-client Politics and Bureaucratic Corruption-Marun Kisirwani 1974

The Oxford Handbook of Political Science-Robert E. Goodin 2011-07-07 Drawing on the rich resources of the ten-volume series of The Oxford Handbooks of Political Science, this one-volume distillation provides a comprehensive overview of all the main branches of contemporary political science: political theory; political institutions; political behavior; comparative politics; international relations; political economy; law and politics; public policy; contextual political analysis; and political methodology. Sixty-seven of the top political scientists worldwide survey recent developments in those fields and provide penetrating introductions to exciting new fields of study. Following in the footsteps of the New Handbook of Political Science edited by Robert Goodin and Hans-Dieter Klingemann a decade before, this Oxford Handbook will become an indispensable guide to the scope and methods of political science as a whole. It will serve as the reference book of record for political scientists and for those following their work for years to come.

The Forgotten Front-Walter C. Ladwig III 2017-06-09 After a decade and a half of war in Iraq and Afghanistan, US policymakers are seeking to provide aid and advice to local governments' counterinsurgency campaigns rather than directly intervening with US forces. This strategy, and US counterinsurgency doctrine in general, fail to recognize that despite a shared aim of defeating an insurgency, the US and its local partner frequently have differing priorities with respect to the conduct of counterinsurgency operations. Without some degree of reform or policy change on the part of the insurgency-plagued government, American support will have a limited impact. Using three detailed case studies - the Hukbalahap Rebellion in the Philippines, Vietnam during the rule of Ngo Dinh Diem, and the Salvadorian Civil War - Ladwig demonstrates that providing significant amounts of aid will not generate sufficient leverage to affect a client's behavior and policies. Instead, he argues that influence flows from pressure and tight conditions on aid rather than from boundless generosity.

The Politics of African Industrial Policy-Lindsay Whitfield 2015-07-02 This book engages in the debate on growth versus economic transformation and the importance of industrial policy, presenting a comprehensive framework for explaining the politics of industrial policy. Using comparative research to theorize about the politics of industrial policy in countries in the early stages of capitalist transformation that also experience the pressures of elections due to democratization, this book provides four in-depth African country studies that illustrate the challenges to economic transformation and the politics of implementing industrial policies.

Routeledge Handbook of South Asian Politics-Paul R. Brass 2010-04-30 The Routledge Handbook of South Asian Politics examines key issues in politics of the five independent states of the South Asian region: India, Pakistan, Bangladesh, Sri Lanka, and Nepal. Written by experts in their respective areas, this Handbook introduces the reader to the politics of South Asia by presenting the prevailing agreements and disagreements in the literature. In the first two sections, the Handbook provides a comprehensive introduction to the modern political history of the states of the region and an overview of the independence movements in the former colonial states. The other sections focus on the political changes that have occurred in the postcolonial states since independence, as well as the successful political changes in Nepal during the same period, and the structure and functioning of the main governmental and non-governmental institutions, including the structure of the state itself (unitary or federal), political parties, the judiciary, and the military. Further, the contributors explore several aspects of the political process and political and economic change, especially issues of pluralism and national integration, political economy, corruption and criminalization of politics, radical and violent political movements, and the international politics of the region as a whole. This unique reference work provides a comprehensive survey of the state of the field and is an invaluable resource for students and academics interested in South Asian Studies, South Asian Politics, Comparative Politics and International Relations.

Politics and Oil in Kazakhstan-Wojciech Ostrowski 2010-02-25 In Kazakhstan, the oil industry plays a crucial role in its economic and political life due to the country’s considerable oil revenues and accompanying conflicting interests. As an arena of political struggle, this industry provides a good test case for uncovering regime maintenance techniques. This book examines the ways in which the post-Soviet Kazakh regime has managed to sustain itself in power, and the regime maintenance techniques it has used in the process of establishing and upholding its position. It scrutinizes the tools that the Kazakh regime employed in order to bring the country’s oil industry under its control and, while doing so, shifts the emphasis from the prevalent zhyr-horde, tribe, and clan-based approaches to Kazakh politics towards corporatism and patron-client mechanisms of control. Based on extensive field work in Kazakhstan and in-depth interviews with high ranking representatives of companies working in Kazakhstan’s oil and gas industry, both local and foreign, the National Oil Company and its subsidiaries, government agencies, foreign diplomats, journalists and representatives of oppositional parties and NGOs, this book provides a comprehensive study of the issues of politics of oil and state-business relationships in Kazakhstan.

Party Politics in Southeast Asia-Dirk Tomsa 2012 Contributing to the growing discourse on political parties in Asia, this book looks at parties in Southeast Asia’s most competitive political electoral democracies of Indonesia, Thailand and the Philippines. It highlights the diverse dynamics of party politics in the region and provides new insights into organizational structures, mobilizational strategies and the multiple dimensions of linkages between political parties and their voters. The book focuses on the prominence of clientelistic practices and strategies, both within parties as well as between parties and their voters. It demonstrates that clientelism is extremely versatile and can take many forms, ranging from traditional, personalized relationships between a patron and a client to the modern reincarnations of broker-driven network clientelism that is often based on more anonymous relations. The book also discusses how contemporary political parties often combine clientelistic practices with more formal patterns of organization and communication, thus raising questions about near analytical dichotomies. Straddling the intersection between political science and area studies, this book is of interest to students and scholars of contemporary Southeast Asian politics, and political scientists and Asian Studies specialists with a broader research interest in comparative democratization studies.

Power, Property Rights, and Economic Development-Mohammad Dulal Miah 2018-11-19 This book presents a critical reassessment of theories of property rights, in response to conflicts and competition between different groups, and the state. It does so by taking an institutional political perspective to analyse the structures of property rights, with a focus on a series of case studies from Bangladesh. In doing so, the book highlights the importance of property rights for economic growth, why developing countries often fail to design property rights conducive for economic development, and the strategies required for designing an efficient structure of rights. Since property rights falls within the domain of Law and Economics, the book ventures to explain legal issues from an economic perspective, resulting in empirical analysis that comprises both legal and non-legal cases.

Business, Politics, and the State in Africa-Doctor Tim Kelsall 2013-01-10 In recent years Africa appears to have turned a corner economically. It is posting increased growth rates and is no longer the world’s slowest growing region. Commentators are beginning to ask whether emerging from Africa is a new generation of ‘lion’ economies to challenge the East Asian ‘tigers’? This book goes behind the headlines to examine the conditions necessary not just for growth in Africa but for a wider business and economic transformation. Contrary to neoliberal economics, it argues that governments can play an important role in this through selective interventions to correct market failures, and, controversially, that neo-patrimonial governance need not be an obstacle to improved business and economic conditions. Drawing on a variety of timely case studies - including Rwanda, Ethiopia, Tanzania and Ghana - this provocative book provides a radical new theory of the political and institutional conditions required for pro-poor growth in Africa.

Clientelism in Everyday Latin American Politics-Tina Hilgers 2012-12-05 In Latin America and beyond, societies are deeply unequal, the poor are marginalized, and states face continuous fiscal shortages and real or potential political instability. In this context, democracy functions imperfectly. It intermeshes with clientelism, with the incongruous result that clientelism not only erodes but also accompanies and supplements democratic processes. Armed with evidence of these complex interactions, Clientelism in Everyday Latin American Politics improves understandings of how and why clientelism endures and why state policy is often ineffective. Political scientists and sociologists, the contributors employ ethnography, targeted interviews, case studies, within-case and regional comparison, thick descriptions, and process tracing. They write from political economy and institutionalist as well as principle-centered and agent-centered perspectives.

End of History and the Last Man-Francis Fukuyama 2006-03-01 Ever since its first publication in 1992, The End of History and the Last Man has provoked controversy and debate. Francis Fukuyama’s prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, The End of History and the Last Man is a modern classic.

The Economic Development of South Asia-Prema-chandra Athukorala 2002 This hefty three-volume reference presents 94 previously published articles and extracts relevant to the economic development of the five major economies in South Asia: India, Pakistan, Bangladesh, Nepal, and Sri Lanka. The editor provides a 12-page introduction explaining the selection process, which was aimed toward balanced subject and country coverage, but wound up with an “India” bias because of the abundance of material on that most populous and most studied country. Also the bulk of papers are country-specific, because there is a dearth of material presenting regional and intra-regional perspectives. Papers are arranged in themed sections, the first volume dealing with economic
conditions at the time of independence, and subsequent evolution of economic development, policy, and the underlying political economy. Volume II covers agriculture and the rural economy, industrialization, and finance; the third volume deals with the external dimension of development, population dynamics, human resource development, and poverty and income distribution. Indexing in each volume is by contributor name only. Annotation copyrighted by Book News, Inc., Portland, OR

Business, Family, and Religion-Yahya Wijaya 2002 Studies in various disciplines have discussed the influence of political economy and culture on the ethnic Chinese business. Focusing on the Chinese-Indonesian business community, this book is intended as a contribution to the discussion from the point of view of theology. Although theological discussions on economic life have been far-reaching, few attempts have been made to give a theological perspective specifically on the ethnic Chinese business practices. This book aims to offer a public theology concerned with particular issues related to the Chinese-Indonesian business context. The focus here is directed particularly to the central position of the family, which characterizes the ethnic Chinese religious, business, political, and social lives. It is argued that a theological approach built upon the concept of the family of God would not only make sense but also have value for the ethnic Chinese, enabling reflection on their political-economic position and economic-cultural virtues.
